

## OPERATORS LOG BOOK POLICY

### What is the purpose of the operators' log book and who must sign it?

The log book is an operator's record of machine usage & experience; therefore MEWP usage on site should be recorded and signed off by the site manager. If this is not possible, any manager at PMC with a MEWPS for Managers certificate can sign the book off.

It is company policy that if you use a MEWP, you must have your log book signed off at the end of a Project, especially for machines you are not familiar with.
